

# Techno LOGO

## Save money and convert more leads by sending your clients virtual samples

[www.technologo.com](http://www.technologo.com) is an online resource accessed through PromoServe Software which allows you to send your customers a link to view a 3D representation of their branded merchandise. You can create and send realistic virtual samples using ANY product image from ANY source, including uploading your own products or from supplier websites.

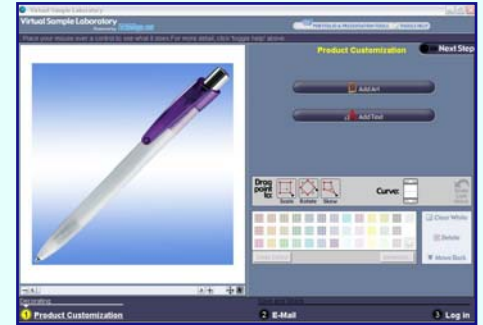

When entering a quotation for a customer, you can quickly and easily send the desired product to [www.technologo.com](http://www.technologo.com), where you can upload text, images and / or logos. If your product is already branded, [www.technologo.com](http://www.technologo.com) comes complete with a Logo Remover suite so that you can present a polished final article to the customer.

Should the customer want to see the product in a different colour, or want the logo to look like it's been laser engraved, you can action these requirements using the Product Colour Changer and using [www.technologo.com](http://www.technologo.com) to simulate a wide variety of imprint techniques.

Once the product is branded, you can email the link straight to your customer and they can view the result in 2D or 3D, or save it to your desktop as a jpeg. No more expensive artist time, no more waiting around, no more delay.

## Key Functions

- ◆ Access Technologo through PromoServe quotations
- ◆ Upload your own products and images or use any other source e.g. supplier websites
- ◆ Remove any existing logos using sophisticated Logo Remover technology
- ◆ Shrink, enlarge, skew, rotate or bend images to suit the product
- ◆ Remove, change the colour or make transparent any part of the image / logo
- ◆ Choose from a wide variety of imprint techniques including embroidery, debossing, embossing, laser engraving glass etching and die struck
- ◆ Insert text and format colour, size and font to match the customer requirements
- ◆ Change the colour of the product to match the customer requirements
- ◆ Ability to show multiple colors and styles to provide your customer with more choice
- ◆ Email the link to your customer who can then view the item in 2D or 3D
- ◆ A visual representation accompanying your quotation is a powerful selling tool
- ◆ Developed in the US by [www.technologo.com](http://www.technologo.com) and PromoServe has the exclusive UK rights to this technology
- ◆ More than 8,000 products already Virtual Sample enabled for download from [www.tradeonly.co.uk](http://www.tradeonly.co.uk).
