

PromoServe LITE

The Industry's Essential Sourcing, Quotation & Order Processing System

PromoServe Lite is a cut-down version of PromoServe, Europe's leading Promotional Products Software package for Suppliers and Distributors. Use of PromoServe Lite gives you a full quotation and order processing system, with picture quotes and back to back ordering.

Designed for smaller distribution companies who do not hold stock on-site, PromoServe Lite includes a comprehensive Catalogue & Products database, which can be auto-populated from an online promotional products portal. Additionally, users of PromoServe Lite can take advantage of the discounts offered by Suppliers using PromoServe / PromoLink, and save up to 2% by placing their orders electronically.

PromoServe Lite will optimise your Sales performance by improving your business processes thus encouraging conversion from quote to order. It will remove much of the work associated with repetitive procedures such as chasing delivery dates and sample management, and encourages best business practice.

Ultimately, PromoServe Lite will enable you to grow your business without the need for additional staff, and can be upgraded to the full PromoServe system with minimal cost. It can be fully integrated with our online eCommerce sites, QuickOrder Portal, in order to offer your customers another means of purchasing your products without stretching your resources.

Key Functions

- ◆ A comprehensive quotation and order processing system to develop your business
- ◆ Guaranteed to help improve your sales performance
