

PromoServe Works PLUS

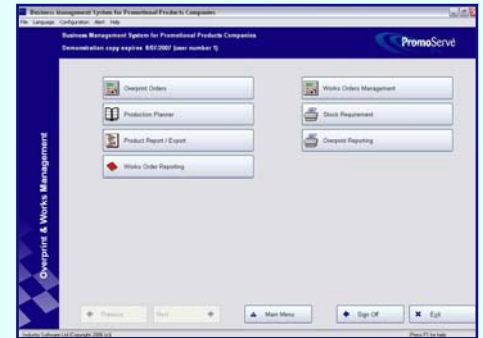

Our Most Comprehensive Package for Promotional Products Suppliers

PromoServe Works Plus includes all of the functionality of Europe's leading promotional products software package, PromoServe, and includes additional routines for Over Print Orders, Works Order Management, Product Planning and Stock Requirement as well as sophisticated report generation tools.

These tools allow Suppliers to manage all of their manufacturing procedures efficiently and minimise repetitive administration procedures. The complete suite of marketing tools available allows Suppliers to easily promote new products to customers and prospects, and the inbuilt Customer Relationship Management facilities will enable you to anticipate and meet your customers' requirements more effectively.

PromoServe Works Plus also enables Suppliers to receive orders electronically from distributors also using PromoServe, with no re-keying required. You can also send your product information to the Trade Only sourcing portal or to other PromoServe users at the click of a button, to ensure that the latest and most relevant information is readily available to your customers.

PromoServe Works Plus is the most comprehensive package in the PromoServe portfolio, and contains all you require to grow your business without taking on more staff, from prospecting to sales management, from purchasing to manufacturing, and from management analysis to customer services. It can also integrate with our online eCommerce website, QuickOrder Portal, so that your customers can order online without stretching your resources.
